

Daniel J. Spade, Ph.D.
Assistant Professor of Pathology and Laboratory Medicine
Brown University

Daniel Spade, Ph.D., is an Assistant Professor in the Department of Pathology and Laboratory Medicine at Brown University. His research is focused on male reproductive biology and toxicology. He received his Ph.D. in Veterinary Medical Sciences with a Toxicology concentration from the University of Florida in 2011 and subsequently completed postdoctoral training at Brown in mammalian male reproductive toxicology. He received a K99/R00 from NIEHS for research on mechanisms of phthalate toxicity in the fetal testis. He also works on a collaborative research project with clinical researchers at Brown-affiliated hospitals to study the roles of sperm RNA in male fertility. Dan has authored or co-authored 21 papers on topics related to reproductive biology and toxicology and has served as an expert peer reviewer for National Toxicology Program technical reports on phthalates and bisphenol AF. Dan is affiliate faculty of the Institute at Brown for Environment and Society and the Brown Center for Children's Environmental Health. In addition to ASA, Dan is a member of the Society of Toxicology, where he has served as the New Career Councilor for the Reproductive and Developmental Toxicology Specialty Section (RDTSS). He was awarded the RDTSS Best Paper Award in 2014 and the Edward W. Carney Trainee Award in 2018.
