

Mammalian Reproduction

Gordon Research Conference

Molecular Mechanisms and Systemic Impacts in Mammalian Reproduction

Chairs

James M Turner and Julie Kim

Vice Chairs

Mala Mahendroo and Serge Nef

Sessions:

- Male fertility and sperm function
- Oocyte development, Meiosis and quality control
- Genetic and hormonal coordination of early reproductive events
- Germline specification and epigenetic reprogramming
- Sex determination and gonadal development
- In vitro models and bioengineering in reproduction
- Cycles, signals and shifts in the female reproductive tract
- Environmental challenges and Reproductive disease

Keynote Session: Legends in Reproductive Biology

Marisa Bartolomei (University of Pennsylvania, USA)

Jan Brosens (University of Warwick, UK)

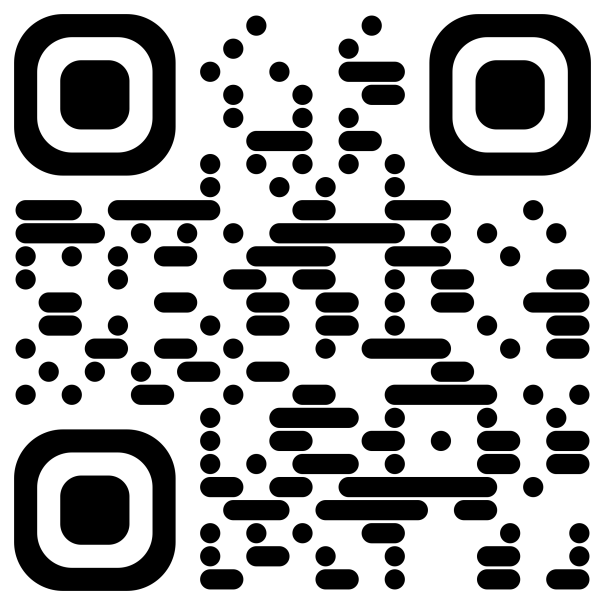

August 9 - 14, 2026

**Apply
now!**

**Grand Summit Hotel at
Sunday River**

97 Summit Road
Newry, Maine, United States

Application due **July 12, 2026**

Related meeting

This GRC will be held in conjunction with the "Mammalian Reproduction" Gordon Research Seminar (GRS). Refer to the [associated GRS program page](#) for more information.
