

ASA-NATW WEBINAR

JUNE 10, 2026 @ 4:00pm-5:00pm ET

Harnessing the Unique Features of Male Reproductive Tract Immune Biology

*Co-chaired by
Jannette Dufour, PhD and
Klementina Fon Tacer, DVM, PhD*

Featuring an introduction by Rachel Babcock, PhD and short talks by Tony DeFalco, PhD, Michael Eisenberg, MD, and Angelique Whitehurst, PhD, followed by time for Q&A discussion with the speakers.

1. Overview of immune cell subtypes and their presence/functions in the male reproductive tract.
2. Understand relevance of immune cell presence and function in male reproductive pathologies.
3. Reveal the biology behind cancer-testis antigens and their relevance for other tumour types.
